Career Objective:
Passionate MERN stack and frontend developer focused on building intuitive, high-performance web applications. Skilled in creating dynamic, responsive user interfaces and developing robust, scalable server-side solutions. Dedicated to writing clean code and leveraging modern web technologies to deliver exceptional user experiences.

Projects:

- **Game Atlas – A Game Discovery Web App:**   **Live Demo**

  - Developed a responsive front-end for a game review platform using React, building reusable components to efficiently fetch and display dynamic content from RAWG API.
  - Implemented dynamic search, sort, and filtering features to enhance user interaction, managing complex application state for a seamless browsing experience

- **Task Manager App:**   **Live Demo**

  - Developed a full-stack Task Manager web app using the MERN stack with secure JWT authentication and cloud deployment.
  - Built responsive UI and RESTful APIs for efficient task management, deployed via Render (backend) and Vercel (frontend).

- **AI Tattoo Generator Web App:**   **Live Demo**

  - Engineered a Node.js backend to integrate with a third-party AI image OpenAI-API, managing asynchronous requests to seamlessly translate user input into visual art.
  - Developed a dynamic front-end for an AI Tattoo Generator using React, creating an intuitive interface for users to input text prompts and view unique, AI-generated tattoo designs.

Skills:

Technical Skills:	Front-End Developer | MERN Stack Developer | Git | GitHub | Java | DSA
Non-Technical Skills:	Time Management | Problem Solving | Collaborative| Flexibility | Documentation | Troubleshooting | Adaptability | Critical Thinking | Active Listening

---

Certifications:

1. **30-Day AI and Web Development Bootcamp – Stoz Academy (May 2024)**

2. **Responsive Web Design – FreeCodeCamp (Jan 2024)**

3. **JavaScript Essentials – Scrimba (Apr 2024)**

Education:

B. E. Computer Science Engineering - Rajalakshmi Engineering College, Chennai   **2022 - 2026**
